Subject: RE: Lane Plating Addendum 01 Sampling and Analysis Plan

My apologies. My email isn't clear.

Regarding the call on Thursday afternoon, our ecological risk assessor and site toxicologist will be out of the office on Thursday of this week. If we have to have the call that day, then I can relay information back to them when they return. Are there specific questions that you have related to their comments? Alternatively, we could try to reschedule the call for another day.

Scott

Kenneth,

A due date of November 15th will work great for the TCEQ. I checked with our risk assessors and there is a chance that our ecological risk assessor will be out of the office that day. If we have to have the call that day, then I can relay information back to him when he returns. Our site toxicologist will also be out of the office on Thursday, so she won't be available for the call. Is there a specific question that you have related to Toxicology's comments?

I could do the standard 30 days (November 20), but it is only 37 pages. November 15 would work well if you think we could do it faster. I don't want to pressure you for a fast return every time. I really appreciate the fast review on the last one. Let me know what you want to do.

Would you and the TCEQ risk assessors be available Thursday afternoon for a call on the Phase one report? We could also cover issues with the FSP if you have a chance to look at it by then.

Kenneth Shewmake
US EPA, Remedial Project Manager

Kenneth,

Please let me know if the EPA is requesting the TCEQ to perform an expedited review for this document. Thanks!

Scott

Subject: Lane Plating Addendum 01 Sampling and Analysis Plan

Mr. Shewmake:

Please find attached a copy of the Addendum 01 Sampling and Analysis Plan for the Lane Plating Works, Inc. Superfund Site Remedial Investigation. One hard copy and one electronic copy on compact disc (CD) is being distributed to your attention. As requested, one electronic copy (on CD) is also being distributed to Mr. Scott Settemeyer, Texas Commission on Environmental Quality Project Manager.

Please let me know if you have questions or comments concerning this matter.

Thank You,
Mark Paddack
EA Project Manager
